***The XR-56 Plus with communication incorporates cell based data transmission that allows you to keep an eye on & manage your pumping systems remotely.***

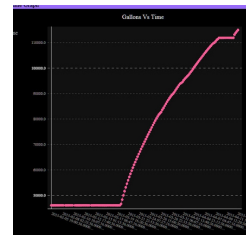

You can monitor pump data, change pump parameters from your smart phone, tablet or computer. The XR-56 pump system can be configured to send data up to 4 times per day at your required time slots. The cell radio wakes up - sends the data and goes back to sleep.

At this point you are able to change set point or even remotely purge a pump. With the XR-56 Plus the task of managing your well field just got simpler, quicker, and more reliable. **It reduces your costs.**

*"We installed one of the XR56 communication units on a troublesome sump that was constantly watering in and shutting down our plant. The XR-56 pump kept our sump dewatered and we are able to remotely keep an eye on the pump and get gallons pumped. We will be adding more soon."*

*"On two of our sites we are required to report monthly pumping volumes. We have deployed the XR-56 communications units and on these wells that task has become so easy and accurate – wish we had more." "I manage three sites so we tried several of the communication units on critical condensate sumps. What a time saver! – I am able to see what is going on all my sites from my phone. We were also able to develop a cleaning schedule for one of the really bad wells based on the pump data."*

- Reliable cell based data transmission. The unit wakes up finds the towers, sends data, and goes back to sleep until the next programmed time.
- Download and graph pump data with a click of a button.
- Monitor critical Condensate sumps and Gas well.
- Integrate pump data into existing data bases.
- Change pump parameters remotely – auto purge a pump from your phone.
- Trend pump data to develop efficient cleaning schedules.

The Xr-56 Plus communication systems give you the tools to better manage your site and reduce operation costs. You get an accurate overview on how your pumps are actually operating. Put technology to work on your site.
