

Jeneer Smart Pump Technology

Zero in-Well Moving Parts - Keeps You Pumping Longer

How does it work?

- ✓ The SDS Technology – senses when the pump is full of liquid then the module uses timed intervals to cycle the pump until drawdown is achieved. **Its that simple!**
- ✓ Handles difficult wells – No parts to get gummed-up – Easily cleaned
- ✓ Evaluated Temperatures Compatible up to 275F

NEMA IV Module Provides:

- ✓ Years of Field Proven Reliability
- ✓ Proprietary Software prevents build-up on the SDS activation sensors

Data Management Options

- ✓ Cell Communications remotely sends your pump data
- ✓ **New** Jeneer Data Collection APP (sends pump data to a smart tablet)

Put the Jeneer Smart Pump to work on your site and start seeing your maintenance costs Decrease and your leachate recovery Increase.
